					Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	#DEC
#DEC: found in December in years prior to 2006																	
* NOTES																	
	Tremella mesenterica: growing in midst of a spread of Stereum hirsutum																
	CORAL FUNGI: None seen																
	CHANTERELLES: None seen																
	Ganoderma lucidum: Not seen before August																
	Grifola frondosa: Seen in Oct. but reported in Sept.																
	Inonotus dryadeus: Throughout the season																
	Phellinus rimosus: Year-round																
	Laetiporus cincinnatis: Several in July																
	Laetiporus sulphureus: Not seen till late fall but reported late summer & fall																
	Agaricus bitorquis: Same location every month from May to December																
	Galerina autumnalis: A fall and early spring mushroom																
	Gymnopilus spectabilis: An Oct.-Nov. mushroom																
	Leucocoprinus cepaestipes: Seen different times in one wood chip mulch area in numbers																
	Marasmius scorodoni: Conspicuous early summer																
	Pleurotus ostreatus: Not seen in Mar, Apr and Aug, 2006 but assumed to occur every month																
	Psathyrella candolleana: Seen in many places and in great numbers																
	Phallus rubicundus: Seen nearly every day between late June and late Oct.																
	Expected but not seen in study area in 2006																
	Armillaria mellea
